\* The degree error for analysis of minerals by NIR is greater than if analyzed by Wet Chem. Therefore Wet Chem is recommended for mineral analysis.

With multiple samples, indicate individual tests below!

SAMPLE I.D.											LABORATORY USE ONLY			
	Fn 1	Fn 2	Fn 3	NO3-N							PAN #	PAN WEIGHT	WET WEIGHT	DRY WEIGHT

We will make every effort to provide an accurate analysis of thses sample. For reasonable cause, we will repeat the tests but, because of factors beyond our control in sampling procedures, and the inherent variability of feeds, our liability is limited to the price of the tests.
